VINYL COAT™

PREPPING VINYL

Clean with **SEM Soap** and a gray scuff pad per instructions. Apply **Vinyl Prep** or **XXX Universal Surface Cleaner** and remove by wiping in one direction with a clean, damp cloth and let dry.

PREPPING PLASTIC

Clean with **SEM Soap** and a gray scuff pad per instructions. Apply **Plastic & Leather Prep** or **XXX Universal Surface Cleaner** and remove by wiping in one direction and let dry. Many plastics require an adhesion promoter. See the Tech Data Sheet for detailed instructions.

APPLYING TO PREPPED VINYL OR PREPPED PLASTIC

Shake **Vinyl Coat** thoroughly. Apply light coats, allowing 5 – 10 minutes between coats. Several thin coats provide a better finish than one heavy coat. Allow 24 hours before putting into service.

39643 TAC FREE

An elastomeric, satin top coat used to eliminate plasticizer migration on coated surfaces.

- 16 oz. aerosol
- Eliminates tackiness on refinished vinyl
- Protective coating
- Resistant to alcohol based cleaners
