

VCS™

VERSATILE CUP SYSTEM

- ADAPTERS
- HARD CUPS
- DISPOSABLE LINERS
- LIDS
- DISPENSER

What does the *VCS* cup system mean for your shop? **More consistency and improved color match**

- **VCS** vented liners allow you to spray vented and unvented, on the fly, depending on where you are on the car
 - **VENTED USE:** provides unrestricted paint flow, which improves color match and consistency
 - **SEALED USE:** gives you more versatility in the paint booth, especially when spraying hard-to-reach areas like wheel wells and rocker panels at extreme angles—even upside down

- **VCS** Liner locks into hard cup, making lid removal easier for refilling
- Specially designed liner vent and hard cup flange eliminate drips
- 13 oz., 22 oz. and 32 oz. cup and liner sizes
- Hard cups available in Mixing Ratios or Blank versions
- Blank cups ensure mixing is completed on a paint scale
- Eliminates the need for a separate mixing cup
- One lid fits all cup sizes
- Built-in filter is removable for higher viscosity liquids such as primer filler
- Wide-mouth stainless steel adapters available for most popular spray guns (see pages 4, 5, 6)
- Saves cleaning time and reduces solvent waste

Are you starving your spray gun? **Hard cup systems and traditional liner systems can restrict paint flow**

Cup A: The vented hard cup system dispensed all fluid in the cup, but produced a stop and go "glugging" restriction that creates an inconsistent paint flow.

Cup B: The liner system created a major restriction, visibly showing that it would starve the spray gun of fluid. The final 8 oz. of fluid in the cup would not flow out of the cup.

VCS Cup: The hard cup and vented liner system dispensed all fluid in the cup, with the vent open. It produced a constant flow of unrestricted fluid for improved color match and a more consistent finish. The **VCS** cup system can be used at any angle, even upside down.

*This test is a visual demonstration of fluid restrictions created by hard cup systems and traditional liner systems.

HARD CUPS & VENTED LINERS

HARD CUPS

- Available in 32 oz., 22 oz., and 13 oz. sizes, with or without mixing ratios
- Impact resistant polypropylene is durable and easy to clean

Part No.	Product	Case Qty	Unit Qty
92130	32 oz. Hard Cup w/mix ratios	10 Units	2 Cups
92132	32 oz. Blank Hard Cup	10 Units	2 Cups
92110	22 oz. Hard Cup w/mix ratios	10 Units	2 Cups
92112	22 oz. Blank Hard Cup	10 Units	2 Cups
92120	13 oz. Hard Cup w/mix ratios	10 Units	2 Cups
92122	13 oz. Blank Hard Cup	10 Units	2 Cups

VENTED LINERS

- Can be used vented or sealed
 - VENTED USE:** provides unrestricted paint flow, which improves color match and consistency
 - SEALED USE:** for painting upside down in wheel wells, rocker panels and hard to reach areas
- Locks into the hard cup, making lid removal easier for refilling
- Available in 13 oz., 22 oz., and 32 oz. sizes

Part No.	Product	Case Qty	Unit Qty
92200	32 oz. Liner	4 Units	50 Liners
92210	22 oz. Liner	4 Units	50 Liners
92220	13 oz. Liner	4 Units	50 Liners

LIDS & SPRAY CENTER DISPENSER

LIDS

- Unique design with 4 snap tabs eliminate the need for an additional locking ring
- Built-in filter is removable for higher viscosity materials
- Fits all **VCS** cup sizes

Part No.	Product	Filter Size	Case Qty	Unit Qty
92300	Lid	125 Micron	4 Units	50 Lids 25 Caps

50 COUNT KITS

- 50 Count Kits available in 3 sizes and 2 filter sizes
- Smart Hinge Box opens for use as a dispenser

Part No.	Product	Filter Size	Size
92720	VCS 50ct	125 Micron	13oz. with Ratio Hard Cup
92730	VCS 50ct	125 Micron	22oz. with Ratio Hard Cup
92740	VCS 50ct	125 Micron	32oz. with Ratio Hard Cup
92750	VCS 50ct	200 Micron	13oz. with Ratio Hard Cup
92760	VCS 50ct	200 Micron	22oz. with Ratio Hard Cup
92770	VCS 50ct	200 Micron	32oz. with Ratio Hard Cup

50 Count Kits include:

1 Ratio Hard Cup, 50 Liners, 50 Lids, 10 Cup Caps

UV KIT

Black cup system blocks out all UV light, preventing premature curing of UV-cured paint in the cup

Part No.	Product	Size
92690	VCS UV Cup Kit	22oz. with Blank Hard Cup

UV Kit includes:

1 Blank Hard Cup, 10 UV Liners, 10 UV Lids with 125 micron filter, 5 Cup Caps

SPRAY CENTER DISPENSER

- Holds 200+ liners and 100+ lids
- In addition to all 3 size liners, dispenser also holds standard 32 oz. mixing cups
- Powder coated steel construction
- Clear door identifies when to refill

Part No.	Product	Unit Qty
92430	VCS Steel Paint Cup Dispenser	1 Dispenser

ADAPTERS

VCS™ VERSATILE CUP SYSTEM

STANDARD OPERATING PROCEDURES

1

INSTALL ADAPTER

Review crossover sheet to determine the correct adapter for your spray gun.

Insert adapter into spray gun and tighten.

2

INSTALL LINER

Insert liner into hard cup. Make sure to align vent tabs on liner with slots in bottom of hard cup.

Turn liner clockwise to lock in place.

Fill cup with desired material.

3

ATTACH LID

Firmly press lid onto assembled cup and liner.

Lock down all four lid tabs.

4

ATTACH CUP TO SPRAY GUN

Press adapter onto assembled cup. Align locking tabs on adapter to corresponding tabs on lid.

Turn clockwise until lid locks in place.

⚠ Locking only takes a quarter turn.

5

OPEN/CLOSE RUBBER VENT

Open rubber vent in liner for most spray applications.

For inverted spray applications, close vent and allow liner to collapse.

⚠ Don't forget to close vent for liquids storage or when inverting.

⚠ CHECK LOCAL VOC REGULATIONS TO ENSURE COMPLIANCE OF ALL PRODUCTS IN YOUR AREA.
ALWAYS WEAR OSHA REQUIRED (PPE) PERSONAL PROTECTION EQUIPMENT TO ENSURE YOUR SAFETY.
